COOL ROOF RATING COUNCIL APPROVAL

Fabral recently received approval on 5 special Valspar colors by the Cool Roof Rating Council (CRRC). This approval allows us to provide painted metal roofs for low slope applications on conditioned buildings in the state of California. Under title 24 of the California energy code, all conditioned buildings with slopes of 2:12 or less must have an initial reflectivity of 0.70 or greater and an initial emissivity of 0.75 or greater. Our CRRC ID number is 0846 and we are listed as a CRRC Licensed Seller.

Our approved colors and full information is as follows:

<u>Paint System</u>	<u>Color Name</u>	<u>TSR</u>	<u>E</u>	<u>CRRC Prod ID #</u>
Dynapon (polyester)	Reflective White	0.70	0.86	0846-0001
Weather X (SMP)	Solar White	0.70	0.85	0486-0002
Fluropon L/S (Kynar low gloss)	Regal White	0.70	0.85	0486-0003
Fluropon (Kynar)	Bone White	0.70	0.84	0486-0004
Fluropon L/S (Kynar low gloss)	Solar White	0.70	0.85	0486-0005

These are not our standard white colors. They are all special bright whites to meet the high Total Solar Reflectivity values required by California. Our listing can also be viewed on the CRRC website at www.coolroofs.org. Then click on the rated products directory tab and then click on the product listing. We are one of the few metal roofing companies to have this approval.
