

COPPERCRAFT®

SOPHISTICATED DESIGN
FOR THE DISTINGUISHED HOMEOWNER

QUALITY, PERFORMANCE AND **DISTINCTION BY DESIGN**

Whether your home is classic architecture or modern inspiration, copper is the perfect choice for you with a range of home styles and applications. CopperCraft offers a highly respected portfolio of custom and standard products that are meticulously crafted for performance and appeal. Working directly with you, your architect or home builder, CopperCraft delivers on a promise of unparalleled quality that will distinguish your property for years to come.

DORMERS

Our artisans bring years of experience into handcrafting distinctive, high-quality, decorative dormers and skylights. CopperCraft louver dormers ventilate attic areas, while window dormers can be used as skylights for added natural light.

CONDUCTOR HEADS

Enhance your home's architectural appeal with CopperCraft conductor heads. Functioning as an overflow for water or ice buildup, our conductor heads deliver prominence with personalized embellishments.

CUPOLAS

Cupolas are handcrafted units that offer a stately touch. Adding a cupola provides a lookout or natural lighting and venting while achieving a distinctive design. CopperCraft cupolas are designed and assembled to endure strong wind and weather conditions.

CHIMNEY POTS & CAPS

Designed to bring style and function to your project, our chimney pots and caps play an essential part in protecting your chimney from damaging weather and pests. Give your home a custom look with these unique CopperCraft products.

SPIRES & FINIALS

CopperCraft spires add a distinct blend of culture and heritage. Our spires can be modified to receive cable for lightning rod core systems and are available in a wide variety of materials. Choose from our classic options or let us fabricate to your specification.

METAL ROOF PANELS

Create visual impact with CopperCraft traditional metal roof panels, which include double lock-standing seam, flat seam and ornamental diamond designs.

DECORATIVE DORMERS

Our artisans bring years of experience into handcrafting distinctive, high-quality, decorative dormers and skylights.

CopperCraft louver dormers ventilate attic areas, while window dormers can be used as skylights for added natural light.

MASTERING COPPER

CopperCraft was established in 1989 with the goal of continuing the high quality and craftsmanship found in old-world metalworking. CopperCraft is committed to educating and training employees, ensuring the art of metal crafting remains relevant for years to come.

Today, through the backing of OmniMax International, Inc., CopperCraft combines traditional craftsmanship with modern day technology and equipment to provide high-quality, architectural products. Our products can be found in homes of distinction throughout the world.

SUPPORT

Our designers are ready to help bring your design from concept to reality with professional project consultation. We work with customers to create the best project plans for all projects.
